Conference Chair

Dear Participants & Colleagues,

As Conference Chair and on behalf of the Organizing Committee, it is my pleasure to welcome you to my beautiful city of Vancouver. We are very pleased that you have joined us for the “Cardiology & Emergency Medicine – 2024” conference.

Vancouver is truly one of the most beautiful cities of the world. I hope that during your visit here, you will find the time to enjoy different parts of this city and its surrounding areas. This multicultural city offers diverse sights and sounds and cuisine.

The interface of Cardiology and Emergency Medicine is where Acute Cardiac Care is delivered. Where crucial management decisions are made by teams of professionals – Cardiologists, ER Physicians, Specialized Nurses, Imaging and laboratory specialists and technicians. Their skills and knowledge are crucial to the outcome of patients. This conference aims to deliver relevant presentations for the practicing clinician on the recent advances in Cardiology and ER medicine. The speakers at this conference are from many different countries and the registrants are also global. It will bring forth the opportunity to learn from these front line practicing specialists, who you may not have heard from at the usual medical association conferences. Please take the opportunity to network and make new connections with the speakers and your fellow registrants.

We wish you an enjoyable and fruitful conference

Alnoor Abdulla MD (UBC)

FRCP(C), FACC, FACP, FCCP (UCLA & USC)

Chair, Cardiology & Emergency Medicine – 2024 Conference

About Venue

Vancouver, a bustling west coast seaport in British Columbia, is among Canada's densest, most ethnically diverse cities. A popular filming location, it's surrounded by mountains, and also has thriving art, theatre and music scenes. Vancouver Art Gallery is known for its works by regional artists, while the Museum of Anthropology houses preeminent First Nations collections.

Vancouver is consistently named as one of the top five worldwide cities for livability and quality of life, and the Economist Intelligence Unit acknowledged it as the first city ranked among the top ten of the world's most well-living cities for ten consecutive years. However, Vancouver also ranks as the most expensive city to live in Canada and as the fourth-most expensive housing market globally. In 2011, the city planned to become the greenest city in the world by 2020. Vancouverism is the city's urban planning design philosophy.

Major film production studios in Vancouver and nearby Burnaby have turned Greater Vancouver and nearby areas into one of the largest film production centres in North America, earning it the nickname "Hollywood North".
